Faculty of Geomatics
Sabaragamuwa University of Sri Lanka

Date: 08/05/2026

Dear Sir,

Local Government Management System and Infobhoomi LPIS Deployment
at Kotte Municipal Council

We are writing to request your official support to engage in the above project as the commercial partner for the Infobhoomi LPIS.

Since the signing of the Memorandum of Understanding (MoU) between SULECO and SUSL in 2020 to explore commercial deployment opportunities for the Infobhoomi LPIS project, we have been actively exploring implementation options.

SULECO has now reached an understanding with the Sri Jayawardenepura Kotte Municipal Council to launch a pilot Local Government Management System and Infobhoomi LPIS deployment. As part of this initiative, SULECO will undertake the data collection activities and system integration component free of charge. We believe this presents an excellent opportunity to further enhance and evolve the Infobhoomi LPIS platform through real-world implementation.

We also strongly believe that this initiative will provide valuable exposure and practical learning opportunities for undergraduate students of the Faculty of Geomatics, particularly in applied geospatial technologies, system development, and municipal-level implementation.

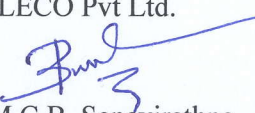

In this regard, we would highly appreciate the opportunity to formalize an understanding with the Department to collaborate on this initiative, ensuring academic engagement and mutual benefit.

Looking forward to hearing from you to discuss this proposal in detail. Please contact the undersigned through 0772440789/ chaminda@suleco.lk

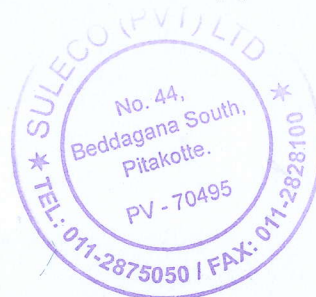

We look forward to your kind consideration and guidance on how we may proceed further.

Yours faithfully,

SULECO Pvt Ltd.
