First Training Programme on SiSePuede–SSP Modelling Tool under the IAA6 Project

The Ministry of Environment is currently implementing the Integrated Assessment for Article 6 (IAA6) Project, which aims to support Sri Lanka in strengthening climate policy planning and implementation through an integrated, evidence-based approach aligned with the Nationally Determined Contributions (NDCs), Sustainable Development Goals (SDGs), and long-term net-zero targets.

As part of this initiative, a computational modelling tool titled **Simulating Sectoral Pathways and Uncertainty Exploration for Decarbonization (SiSePuede–SSP)** is being developed to support national decision-making processes. The model is expected to assist in analyzing key sectors, including Energy, Transport, Industry, Waste, Agriculture, Land Use and Forestry, and Socio-economic systems within a unified framework.

In this regard, the first training programme on the SiSePuede–SSP modelling tool will be held **from 8.30 a.m. to 4.15 p.m. on 26 May 2026 at the Lotus Hall, Water's Edge, Battaramulla.**

The training programme is intended to provide nominated sectoral focal points with an introduction to the modelling framework, its data requirements, and its application in supporting climate policy planning and sectoral pathway development. Accordingly, you are kindly requested to attend this important programme as the nominated sectoral focal point of your institution.

The workshop agenda is attached herewith for your reference.

Kindly note that as the programme is planned for a limited number of participants, your confirmation via hansika.premarathna@yahoo.com of attendance at your earliest convenience would be highly appreciated.

R.H.M.P. Abeykoon
Additional Secretary (Environment Policy & Planning)
